Chemical management policy adopted by SlovTan Contract Tannery, spol. s r.o. sets out elementary philosophy of the company covering an area of using chemicals and chemical preparations. As a part of this policy is the establishment of a reliable system of safety and health at work.

The company is aware of the need of using chemicals and chemical preparations within its production process and, at the same time is fully aware of the risks that these chemicals pose to human health and environment.

The management of the company constantly contributes to the delivery of chemical management policy.

We are committed to:

- Implement activities of the company in accordance with the relevant legal regulations and legal requirements for chemical safety, environmental protection, and OSH.
- Reduce the burden of the workplace and environment by responsible selection of safe/ less hazardous chemicals. Go ahead constantly and improve in prevention of adverse effects from the chemicals on human health and environment.
- Subject the access to chemicals and restricted substances to the current legislation and LWG requirements, as well as to reduce the number of chemicals used in formulas.
- Subject the selection of chemicals and suppliers to EU legislation as well as to the restrictions related to dangerous and prohibited substances (REACH, ZDHC, MRSL, GADSL, California Proposition 65, ...)
- Focus on the exclusion of chemicals with content of MRSL.
- Lead the employees to behave responsibly to environment through regular awareness-raising about chemical safety and chemical hazards.
- Minimise the quantity of unused/ residual disposal.
